CONTENTS OF VOLUME 164

NUMBER 1, MARCH 1994

RAMZI KUTTEH AND L. L. VAN ZANDT. Dipole Moments and Selection Rules for Raman Scattering from Helical Molecules: The Higgs Rules as a Special Case Subset 1

ANINDYA HAZRA, PRADIP N. GHOSH, AND R. J. KSHIRSAGAR. Fourier Transform Infrared Spectrum and Rotational Structure of the A-Type 917.5 cm^{-1} Band of Nitromethane 20

LEONID A. KALEDIN, JOHN E. MCCORD, AND MICHAEL C. HEAVEN. Laser Spectroscopy of UO: Characterization and Assignment of States in the 0- to 3-eV Range, with a Comparison to the Electronic Structure of ThO 27

M. L. SENENT, D. C. MOULE, Y. G. SMEYERS, A. TORO-LABBÉ, AND F. J. PEQALVER. A Theoretical Spectroscopic Study of the $\tilde{A}^1A_u(S_1) \leftarrow \tilde{X}^1A_g(S_0)$, $n \rightarrow \pi^*$ Transition in Biacetyl, $(CH_3CO)_2$ 66

V. DUNJKO, D. CLARK, M. NISCHAN, AND A. W. MANTZ. Absolute Intensities of Unperturbed Lines in the ν_2 and ν_5 Bands of $^{12}CH_3F$ 79

HANS BÜRGER, SENYUAN MA, AND BRENDA P. WINNEWISSER. High-Resolution FTIR Investigation of the ν_2 Band of KrF_2 and XeF_2 84

MICHAEL D. DI ROSA AND RONALD K. HANSON. Collision-Broadening and -Shift of NO $\gamma(0,0)$ Absorption Lines by H_2O, O_2, and NO at 295 K 97

JOHN A. COXON, MINGGUANG LI, AND PAUL I. PRESUNKA. Laser Spectroscopy of the $(010)^2\Sigma^{(+)}$, $^2\Sigma^{(-)}$–$(000)^2\Sigma^+$ Parallel Bands in the $\tilde{A}^2\Pi$–$\tilde{X}^2\Sigma^+$ System of CaOH 118

E. A. SHENYAVSKAYA, J. VERGÈS, A. TOPOUZKHANIAN, M.-A. LEBEAULT-DORGET, J. D'INCAN, C. EFFANTIN, AND A. BERNARD. Characterization of the $c^3\Sigma^+$ State of ScF: The $c^3\Sigma^+$–$X^1\Sigma^+$ System 129

XIAONAN ZHENG, MICHAEL C. HEAVEN, AND JOEL TELLINGHUISEN. Spectroscopy of Metastable Species in a Free-Jet Expansion: The $D' \leftarrow A'$ Transition of IBr 135

F. HEGELUND, H. BÜRGER, AND O. POLANZ. The High-Resolution Infrared Spectrum of the ν_9, ν_{10} Band System in $H_2C{=}{}^{13}C{=}CH_2$ 152

MOSHE PYERNIK AND BENJAMIN E. SCHARF. Striking Enhancement and Retarding Effects in the Multi-quasi-resonance Evolvement in Electronic $A \rightarrow E \otimes e$ Jahn–Teller Spectra 167

M. EL AZIZI, F. RACHET, A. HENRY, M. MARGOTTIN-MACLOU, AND A. VALENTIN. Linestrength Measurements for N_2O around 4 μm: $\Sigma \leftarrow \Sigma$ Transitions in Four Isotopic Species (2400–2600 cm^{-1}) 180

F. RACHET, M. MARGOTTIN-MACLOU, M. EL AZIZI, A. HENRY, AND A. VALENTIN. Linestrength Measurements for N_2O around 4 μm: $\Pi \leftarrow \Sigma$, $\Pi \leftarrow \Pi$, $\Sigma \leftarrow \Pi$, and $\Delta \leftarrow \Pi$ Transitions in $^{14}N_2{}^{16}O$ (2400–2850 cm^{-1}) 196

M. HERMAN AND A. PISARCHIK. Spectroscopy of C_2D_2 in the $3\nu_3$ Region 210

G. DI LONARDO, P. FERRACUTI, L. FUSINA, AND E. VENUTI. Vibration–Rotation Spectra of ^{13}C-Containing Acetylene: The $\nu_1/\nu_2 + 2\nu_5$ Fermi Dyad 219

V. N. MARKOV. Temperature Dependence of Self-Induced Pressure Broadening and Shift of the 6_{43}–5_{50} Line of the Water Molecule 233

M. A. H. SMITH, C. P. RINSLAND, V. MALATHY DEVI, AND E. S. PROCHASKA. Measurements of Pressure Broadening and Shifts of O_3 Lines in the 3-μm Region 239

2 731HI XL 1114
9/94 31249-150

ANDREW M. JAMES, PAWEL KOWALCZYK, AND BENOIT SIMARD. Molecular Beam Laser Spectroscopy of Some New Band Systems of the Niobium Dimer Molecule 260
M. JACKSON, G. R. SUDHAKARAN, R. M. LEES, A. SILVEIRA, JR., AND I. MUKHOPADHYAY. FIR Laser Stark Spectroscopy of $CH_3{}^{18}OH$ 275
LI-HONG XU. Fourier Transform Spectroscopy of $^{13}CD_3OH$ Methanol: The Torsional Band in the 14–240 cm^{-1} Range 287

NOTES

M. HEPP, G. WINNEWISSER, AND K. M. T. YAMADA. Conservation of the Nuclear Spin Modification of CH_4 in the Cooling Process by Supersonic Jet Expansion 311
PER JENSEN AND P. R. BUNKER. The Molecular Symmetry Group for Molecules in High Angular Momentum States 315

JOURNAL OF MOLECULAR SPECTROSCOPY

INFORMATION FOR AUTHORS

Manuscripts describing original work in areas of molecular spectroscopy should be submitted to K. Narahari Rao, Department of Physics, The Ohio State University, Columbus, Ohio 43210.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Molecular Spectroscopy* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. As in the past, the Publisher will continue to grant all reasonable requests for permission to reproduce material from contributions appearing in the Journal. However, it is recommended that such requests be first made to the Editor for appropriate action.

Form of Manuscripts. Manuscripts in duplicate should be typewritten with wide margins on high-quality bond paper using double or triple spacing throughout. Copies should include figures, tables, etc.

Each page of the manuscript should be numbered. The first page should contain the article title, author's name, and affiliation. At the bottom of this page, the number of manuscript pages, figures, and tables should be noted. The second page should contain a proposed running head of less than thirty-five characters. It should also contain the name and complete mailing address of the person to whom proofs are to be sent. The third page should contain an abstract.

"Letters to the Editors" will be devoted to the announcement of important results with a minimum of delay. "Notes" will also be published as speedily as possible. Contributions to this section containing "Letters to the Editors" and "Notes" should not exceed 1½ printed pages, including figures, equations, and tables. They should follow the style and form used for manuscripts except that they need not be accompanied by abstracts.

List of Symbols. Authors should submit a complete list of symbols identifying each for the printer. This list will not appear in print.

Tables. Tables are to be numbered consecutively with Roman numerals. The table numbers and titles should be listed on a separate sheet. *Tables will be reproduced as camera-ready copy.* Therefore, they should be carefully and clearly typed since, except for reduction in size, they will appear exactly as submitted. If the tables will be prepared using a word processor or computer, it is recommended that a daisy wheel printer be used. If a daisy wheel printer is unavailable and you will be using a dot matrix printer, it is important that the density of the dots (i.e., the number of dots in the matrix) be sufficient that the numbers do not appear broken. Short tables of one or two pages in length should be typed double-spaced and planned to fit an area of 5 × 8¼ in. after reduction of no more than 40%. Lengthy tables should be typed single-spaced and divided into sections so that each section can fit in the area indicated. *Repeat column headings when dividing tables.* No corrections can be inserted after the line cuts have been made. Do not use a comma to separate groups of 3 digits; merely use a space. For instance: 2,526,000 should be typed 2 526 000. Insert a zero in front of a decimal point when it applies. For instance, instead of .36, use 0.36.

Footnotes to tables should be identified by superscript letters and placed at the bottom of the page containing the table. Footnotes in the text should be identified by superscript numbers and listed consecutively on a separate page.

Equations. Equations should be numbered consecutively with the number placed in parentheses to the right of the equation. Reference to equations should use the form Eq. (3).

References. References should be cited in the text by underlined number in parentheses (in order of appearance). The literature cited should appear on a separate page (double-spaced) and should be listed consecutively according to reference number. Following the reference number, the author's initials, last name, journal name, volume, inclusive pagination, and year (in parentheses) should be listed in that order. Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index,* 1985. For book references give the author's name, name of book, editor's name (if any), edition (if other than first), chapter or page number, publisher's name, place, and year of publication.

Figures. All illustrations should be numbered as figures in sequence with Arabic numerals. Each figure should have a descriptive legend and these should be listed on a separate sheet. Figures should be planned to fit the proportion of the printed page (5 × 8¼ inches), and care should be taken that lettering on the original is large enough to be legible after a reduction of 50 to 60 percent. Illustration copy should measure no larger than 12 × 15 inches. Each figure should be identified in a margin with the name of the journal, author's name, and figure number. Photocopies of figures are not acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Proofs. Proofs will be sent to the author, with reprint order forms. Fifty reprints of each article are granted free of charge, and additional copies may be purchased. Authors will be charged for excessive alterations.

Personal Computer Disks. Manuscripts may be submitted to *Journal of Molecular Spectroscopy* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material and art must also be prepared as camera-ready copy; see the sections on Tables and Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
